Streamyard
Changing Audio Settings

When you enter the studio, select your microphone by clicking on the gear labeled “Cam/Mic”.

Select “Audio” to find microphone settings.

Audio settings allow you to see your current microphone and speakers and allow you to make changes.

Select the drop down under “Mic” to select the correct microphone.

If you need to make mic changes during a stream, the same gear with “Cam/Mic” can be accessed on the bottom of your screen.
